

Name: Siv Lyheng

Movie: **Something the lord made**

Introduction

This movie describes about a young man who struggle from a person who has financial problem and tend to study at university, become someone who discover a cure for blue baby syndrome and the greatest teacher at the top university in USA.

Plot summary

The movie started with a young man called Vivien Thomas, who has finished high-school and was planning to join a university in medical. Unfortunately, the bank that he had saved money for university, has been closed that why he couldn't afford to study in medical university. Then he decided to work with Dr. Alfred Blalock on a research project. Soon, they faced with significant risk or disease called blue baby syndrome. In order to solve this risk, first they tended to create this condition in a dog as a model, and after they got the model they tried to find a solution or to find a cure for this condition. From their experiment, they finally could find a cure by creating a shunt that could provide more oxygenated to the lungs.

Analysis

the movie has shown the scientific and emotional journey of Vivien Thomas who worked to save lives even though he was someone without a medical degree. Meanwhile all the researcher, relevant doctors and Dr. Blalock were celebrating their success on finding a cure of the heart disease. However, Vivien felt a bit resentful because his name wasn't listed or mentioned on the news or on the banquet as he just was a surgical technician and not a doctor or someone with a medical degree.

Personal Opinion

Vivien still continued on this field because he loves his job, his work in saving people life and teaching young doctors, and surgeons. This part is really inspired me to do what we love and a bit nostalgic at the end because Dr. Blalock admitted his mistake to Vivien and said sorry because he was self-righteous and not put credit for Vivien despite his contribution.

Conclusion

Something the lord mad is really a motivating movie since it shows about a journey of someone who has financial problem but has ambition, from someone who is unknow

becoming a world hero that contribute in finding a cure for blue baby syndrome and a great teacher in medical school even though he wasn't with a medical degree.
